Chemical Injection Packages

Type Of Service

- Corrosion Inhibitor
- Anti Foam
- Methanol
- Sulphuric Acid
- Amine
- Biocide
- Demulsifier
- Reverse Demulsifier
- Hypochlorite
- Oxidizing
- Polyelectrolyte
- Caustic Soda
- Anti - Scalent
- Disperasnt Dosing
- Acid Dosing
- PH Adjustment
- Nutrient
- Flocculant
- Coagulant
- Fec13 Dosing

Our Tradition

Within the Oil and Gas Industry, the requirements for Chemical Injection Packages are very diverse depending on the application, location, number of chemicals, multi-point injection, increases in production output and changes in production conditions.

By utilizing its wealth of experience and expertise, I.P.Farayand is capable of designing, manufacturing, testing and certifying Injection systems to meet the specific customer and industry needs.

About I.P.F Co.

Industrial Pioneers Farayand Company's (I.P.F. Co.) activities have been started based on industrial designing, manufacturing and operating consisting of chemical, petroleum, mineral, pharmaceutical and food industries since 1990.

Products quality and company services made us to be available in the current projects of the country and conducting key projects.

To achieve total customer satisfaction we will continue to meet the complex technical challenges of the future with confidence and enthusiasm.
